Dear Tom:

On behalf of NAB, thank you for helping make NAB's transition to Apple's Final Cut Pro editor smooth, efficient and a cost-effective success.

Our instructors' goal of challenging attendees to look at editing differently made an important contribution to our training. His insightful and "real world" examples gave the editors much to think about as they returned to their suites and faced the next project at hand. FMC provided the know-how and faculties to make this training experience "top-of-the-line".

I hope that the NAB partnership with FMC continues to bring effective technology education to video professionals, artists and designers for years to come.

Sincerely,

A handwritten signature in cursive script that reads "Bill Dion".

Bill Dion
